3D Glass / Custom Patterned Glass

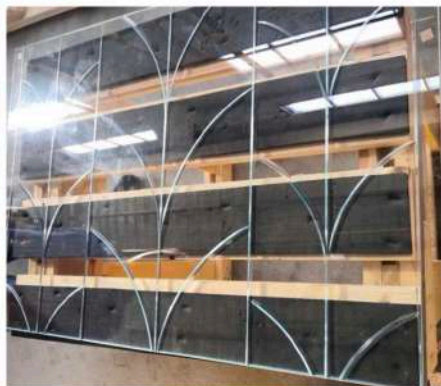

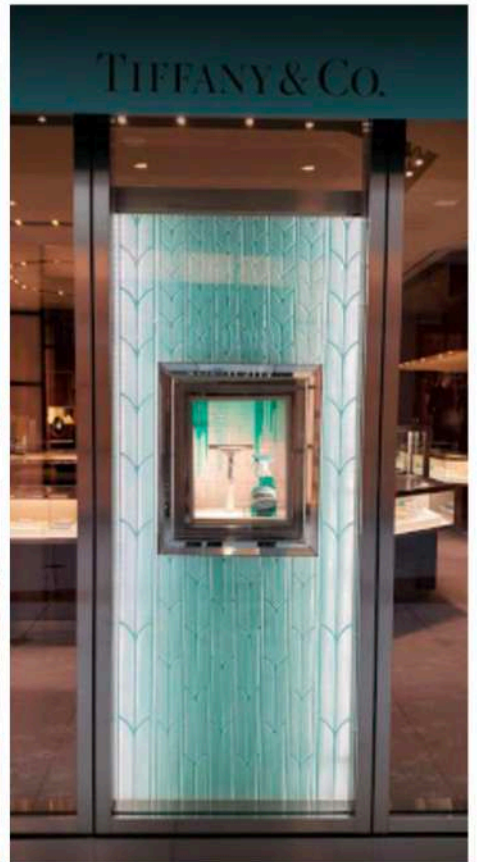

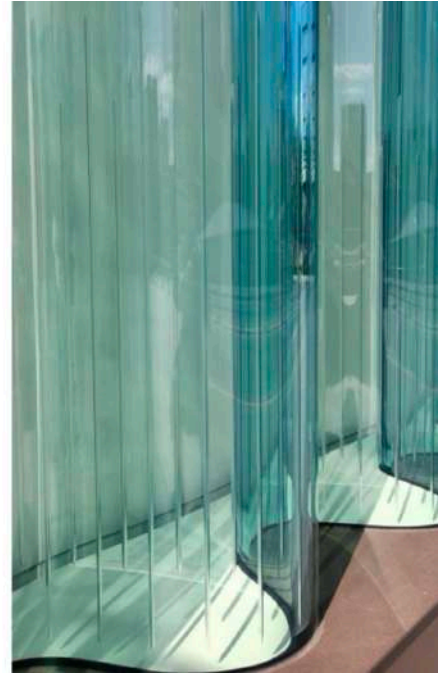

Known for its distinctive 3D appearance and superb optical clarity, *Phoenix AG+M '3D Glass'*, is a decorative glass product with unlimited design potential. Through a unique production method regulating air pressure and abrasive material, geometric and free-formed artwork patterns are carved within the glass surface and can be precisely replicated from panel-to-panel with ease.

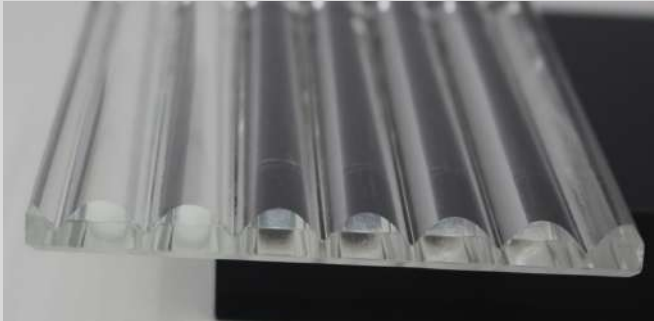

Produced in jumbo sizes up to 275" and a maximum glass thickness of $\frac{3}{4}$ ", 3D Glass is available in both laminated & tempered formats (pending confirmation of pattern and glass thickness) and can be produced with a combination of transparent & translucent surface effects, further enhancing the 3D aspect.

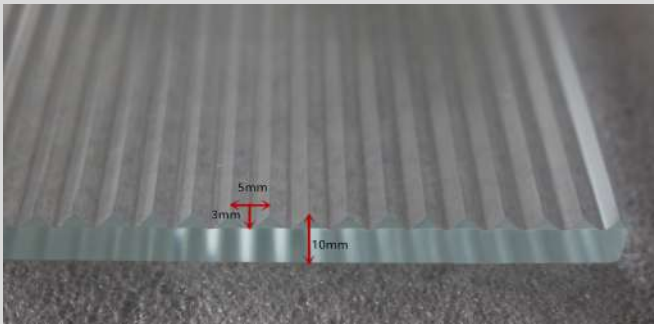

3D Glass is suitable for both interior & exterior applications. It is available in variety of tinted float glass options; laminated with specialized interlayer material; and prepared as a digitally printed or back-painted glazing product.

QUALITY ▫ SERVICE ▫ VALUE = PHOENIX AG+M

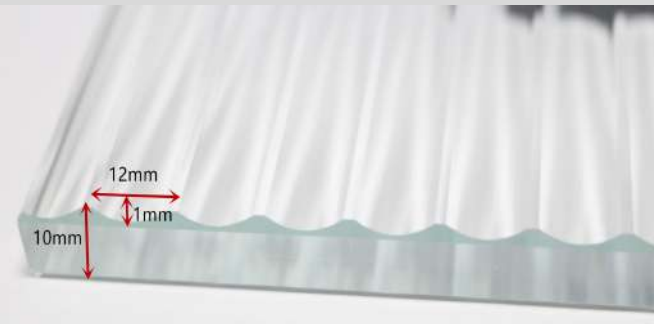

Pattern Name : Embossed
Glass Thickness : 1/4" – 3/4"
Max. Size : 78 3/4 x 275 1/2"
Pattern Width Range : 3/8" – 1 3/16"
Pattern Depth Range : 1/32" – 5/64"

Pattern Name : V-Groove
Glass Thickness : 1/4" – 3/4"
Max. Size : 78 3/4 x 275 1/2"
Pattern Width Range : 1/8" – 13/16"
Pattern Depth Range : 1/32" – 3/16"

Pattern Name : U-Groove
Glass Thickness : 1/4" – 3/4"
Max. Size : 78 3/4 x 275 1/2"
Pattern Width Range : 1/8" – 13/16"
Pattern Depth Range : 1/32" – 5/64"
